

COASTAL

NEW MIXTURE FOR 2021:

A high performance mixture formulated especially for links courses

Aporina	Slender Creeping Red Fescue	50%
Cathy	Slender Creeping Red Fescue	50%

MIXTURE BENEFITS:

- MM Coastal contains 2 top performing slender creeping red fescue cultivars – perfectly suited to coastal environments
- Excellent shoot density
- Excellent visual merit
- Good resistance to red thread
- Drought tolerant
- High salt tolerance
- Suitable for sustainable golf use
- Perfect for use on Greens, Fairways and Tees

MM Coastal is perfectly suited to coastal environments

SUITABILITY FOR USE IN CLOSE MOWING (GREENS):

	Shoot Density	Visual Merit	MEAN	Resistance to Red Thread	Winter Green	Summer Green
CATHY	7.4	7.2	7.3	6.4	4.6	5.4
APORINA	6.9	7.1	7.0	6.5	6.0	5.5
List Mean	6.7	6.7	6.7	6.3	5.9	6.3

SUITABILITY FOR USE IN LAWNS, LANDSCAPING, SUMMER SPORTS (Tees and Fairways):

	Shoot Density	Visual Merit	MEAN	Resistance to Red Thread	Winter Green	Summer Green
CATHY	7.3	7.3	7.3	6.1	4.9	5.9
APORINA	7.3	7.6	7.5	7.0	6.3	5.8
List Mean	6.6	6.6	6.6	6.2	6.1	6.3

SALT TOLERANCE:

- Slender creeping red fescue is one of the most salt tolerant species of commonly used amenity grass – significantly more tolerant than diploid perennial ryegrass and other fescues, making them perfect for links situations
- In house salinity tests have shown significant variation between slender creeping red fescue cultivars, with both Aporina and Cathy scoring very highly (significantly higher than Barcrown or Absolom)

MM Coastal is treated with Headstart Gold for fast and healthy germination
